

# TCAG New Technologies Seminar

## Alamut software: clinical interpretation of genetic variants

**Date:** Tuesday, June 25  
**Time:** 1:00 – 3:00 pm  
**Location:** Clinical Genetics Conference Room  
(9<sup>th</sup> floor 940 conference room)  
SickKids Hospital, 525 University Ave., Toronto  
**Speaker:** André Blavier, MD, MS  
Founder and CEO  
Interactive Biosoftware

Alamut provides geneticists and researchers with sophisticated software for diagnostics, surveillance, and information sharing between, and across, all tiers of human genome research. This seminar and workshop will cover:

- Presentation of Alamut's main features
- Review of frequently asked questions
- Focus on Alamut's integrated BAM alignment viewer
- Presentation of Alamut-HT; batch annotation software for NGS
- Future developments

The presentation itself will take less than 1 hour, with 30-45 minutes for questions and discussion.

Hosted by The Centre for Applied Genomics and  
the Ontario Genomics Institute
